

Hot Degrees 2024: The Year's Major Astrological Events

Here, handily summarized, you will find the dates and degrees of all the stations, eclipses and outer planet sign changes in 2024—plus any conjunctions, oppositions or squares between those planets and Mars. The bottom of this page shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto.

Page 2 shows these important astrological events in the usual arrangement by date. Pluto enters Aquarius once again on January 20 but does venture back into Capricorn for one last hurrah on September 1 and then re-enters Aquarius on November 19th. We are likely to see more debate about the uses of AI and other technologies that will likely change the world as we know it. The conjunction of Jupiter and Uranus on April 20 may signify a unique opportunity to make significant breakthroughs.

Page 3 arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square or oppose your chart points. Also, the column headed “45°/135°” shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2024 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart (and maybe also your progressed, solar-arc-directed and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees.

On Page 4 is a 45 degree graphic ephemeris for the entire year. Look for line intersections. Because the graph is in the 45 degree modulus, you can easily see semisquares and sesquiquadrates. Direct and retrograde stations are easily seen as the peaks (Station Rx) and troughs (Station D) on the curves. You can even draw lines for your natal positions across the graph by using the handy 45-degree equivalency guide on page 5. More info on using a graphic ephemeris can be found at <http://www.astralis.it/45deg.htm> an article by Mary B. Downing, a great friend of Astrolabe.

All calculations were done by the best-selling astrology program *Solar Fire 9*, available from <https://alabe.com>

Now on the Brink of a Major New Version

Solar Fire X Coming Soon!

The World's leading astrology program for Windows will now be native on the MAC!

SOLAR FIRE has something for everyone. For advanced astrologers and professionals, it has a great variety of high-precision astrological calculations, and an exceptional degree of user-customization. For Novices, its innovative point-and-click chart interpretations provide an enjoyable way to learn, and its many easily-explored options are an invitation to experiment with new techniques.

Start Your Own Astrology Business!

Astrolabe Reports Software combines **great text** and a beautiful presentation to provide the **finest astrology and numerology reports**. Ask about our innovative *Astrolabe Kiosk* which will allow you to automatically deliver astrology reports from your website.

NOVA CHARTWHEELS

This novel and highly interactive calculation program makes it practical to do complete readings from the screen, getting instant on-the-spot info for whatever questions your client throws at you. Designed by Gary Christen and Ray White for busy professionals, *Nova Chartwheels* also tracks *appointments and billing hours*, and even *records your readings*. And—besides standard calculations and the usual printouts—it gives you the most *complete, imaginative and in-depth array of dials and symmetrical astrology tools* anywhere.
