

The Major Astrological Events of 2014

Here, handily summarized, you will find the dates and degrees of all the stations and eclipses in 2014—plus any conjunctions, oppositions or squares between the slower-moving planets Jupiter, Saturn, Uranus, Neptune and Pluto.

- *Page 2* shows these important astrological events in the usual arrangement by date. Here you will see that *the major action takes place in the second half of April*, which includes 2014's Uranus-Pluto square augmented by two eclipses, a Pluto station, and Jupiter both squaring Uranus and opposing Pluto.
- *Page 3* reveals how these events would affect your chart by the most potent and noticeable aspects. Here the events are arranged by their degree within each sign mode, showing how they would conjunct, square or oppose your chart points. Further, the column headed "45°/135°" shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have potent and noticeable effects). In 2014 *the major action takes place in the Cardinal signs, with a truly remarkable emphasis on 12 and 13 degrees Cardinal (and, by semi- and sesqui-square, 27 and 28 degrees Fixed)*. To see how the most important transits of 2014 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart. It can also be highly instructive to compare these degrees with your 2014 progressed and solar-arc-directed charts.
- As a bonus, *the bottom of this page* shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto. These, too, can have a noticeable effect through square, opposition and semi- and sesqui-square aspects as well as conjunctions to chart points.

All calculations were done by the best-selling astrology program *Solar Fire Gold v8*, available from <http://Alabe.com>.
