

Hot Degrees 2026: The Year's Major Astrological Events

Here, handily summarized, you will find the dates and degrees of all the stations, eclipses and outer planet sign changes in 2026—plus any conjunctions, oppositions or squares between those planets and Mars. The bottom of this page shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto.

Page 2 shows these important astrological events in the usual arrangement by date.

Page 3 arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square or oppose your chart points. Also, the column headed “45°/135°” shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2026 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart (and maybe also your progressed, solar-arc-directed, and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees.

On Page 4 is a 45 degree graphic ephemeris for the entire year. Look for line intersections. Because the graph is in the 45 degree modulus, you can easily see semisquares and sesquiquadrates. Direct and retrograde stations are easily seen as the peaks (Station Rx) and troughs (Station D) on the curves. You can even draw lines for your natal positions across the graph by using the handy 45-degree equivalency guide on page 5. More info on using a graphic ephemeris can be found at <http://www.astralis.it/45deg.htm> an article by the late Mary B. Downing, a great friend of Astrolabe.

I want to acknowledge the astrologers who created these lists in the past, Pat White and Bart Lidofsky. A huge thanks to Andrea Arden who once again created this year's list. Having done it myself last year, I can tell you that it is no easy task.

To get an interesting perspective on the outer planet transits of the last 500 years, read Doug Kellogg's blog at <https://500yearparty.com/>.
