## Hot Degrees 2019: The Year's Major Astrological Events

Here, handily summarized, you will find the dates and degrees of all the stations, eclipses and outer planet sign changes in 2019-plus any conjunctions, oppositions or squares between those planets and Mars. The bottom of this page shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto.

Page 2 shows these important astrological events in the usual arrangement by date. Note that in early March, Uranus once again moves from the potential energies of Aries to the Earthy practicalities of Taurus, just as Mercury goes retrograde. And in July, we have a Lunar Eclipse during another bout of Mercury's moving back to join the fun.

Page 3 arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square or oppose your chart points. Also, the column headed " $45^{\circ} / 135^{\circ}$ " shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2018 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart (and maybe also your progressed, solar-arc-directed and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees.

On Page 4 is a 45 degree graphic ephemeris for the entire year. Look for line intersections. Because the graph is in the 45 degree modulus, you can easily see semisquares and sesquiquadrates. Direct and retrograde stations are easily seen as the peaks (Station Rx) and troughs (Station D) on the curves. You can even draw lines for your natal positions across the graph by using the handy 45 -degree equivalency guide at the bottom of page 3 . More info on using a graphic ephemeris can be found at http://www.astralis.it/45deg.htm in an article by Mary B. Downing, a great friend of Astrolabe.

All calculations were done by the best-selling astrology program Solar Fire 9, available from http://Alabe.com.
