Hot Degrees 2020: The Year's Major Astrological Events

Here, handily summarized, you will find the dates and degrees of all the stations, eclipses and outer planet sign changes in 2020 - plus any conjunctions, oppositions or squares between those planets and Mars. The bottom of this page shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto.

Page 2 shows these important astrological events in the usual arrangement by date. Put on your seat belts... this is going to be a bumpy year! Both Venus (May-June) and Mars (September-November) will be retrograde. The already contentious American election of November 3, 2020 will be further complicated by Mercury going direct early in the day and Mars still being retrograde. And, Saturn does a little dance with Pluto in January, and does a springtime dance, moving in and out of Aquarius before moving in with Jupiter in mid-December, right after a Solar Eclipse.

Page 3 arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square, or oppose your chart points. Also, the column headed "45°/135°" shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2020 affect you, compare this table with the degrees in the Cardinal, Fixed, and Mutable signs in your chart (and maybe also your progressed, solar arc directed, and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees.

On Pages 4 and 5, are 45 degree graphic ephemerides for the first and second half of the year. Look for line intersections. Because the graph is in the 45 degree modulus, you can easily see semisquares and sesquiquadrates. Direct and retrograde stations are easily seen as peaks (Station Rx) and troughs (Station D) on the curves. You can even draw lines for your natal positions across the graph by using the handy 45-degree equivalency guide on *Page 6*. More info on using a graphic ephemeris can be found at www.astralis.it/45deg.htm in an article by the late Mary B. Downing, who was a great friend of Astrolabe.

All calculations were done using the best-selling astrology program Solar Fire 9, available at alabe. com. Happy 2020!

-- Bart Lidofsky and Madalyn Hillis-Dineen

Coming Soon for iPhone and Android!

CELESTE PLUS

With Celeste Plus you can:

- Instantly calculate a natal chart and get the applying transits and progressions for that chart. Choose from various pre-sets for short or long range readings.
- Always know the current state of the heavens and see interpretations based on the next aspects to be made by the Moon and planets.
- Do synastry and composite charts for any couple.
- Store charts in the cloud and import your Solar Fire charts.
- Access a complete 250,000+ place atlas for time zones and latitude/longitude information.
- Choose from 40 house systems, tropical or sidereal zodiacs.
- Use GPS mode to create a chart for your exact location.
